

GeViScope 7.8.974.20

Software	Type	Short description	Detailed description
New Feature	Export	Read G-Core GBF file in GscView	The GeViScope DBI interface has been enhanced. GBF files generated by a G-Scope device with G-Core software can therefore be read and displayed in GscView now. This is additionally also possible on older computers with Windows XP operating system.
New Feature	IP-Cameras	PTZAreaZoom	PTZAreaZoom is an advanced feature for controlling an area within a viewer. If a position is select by Stick or mouse (PTZ) the extract can be centered and maximized in the viewer window. Or a selected rectangle within the viewer can be zoomed in. The feature is available for Axis cameras.
Extension	Interface	New LENEL Action	A new action "LenelGenericEvent" for the use of the LENEL OnGuard interface has been added.
Bug fix	Export	Error message at export	When exporting a cutlist an access violation occurs. This bug has been fixed.
Bug fix	IP-Cameras	Syncloss - IP camera plugins	Regarding plugins of the IP cameras from Sony, E3 and Topline several short-time syncloss occurred. As a result, pictures got lost for the same period of time. The connection is permanent stable now. This bug is fixed.
Bug fix	Video Encoder	Compatibility loss - AXIS cameras	The introduction of Axis Firmware (>5.60) caused compatibility loss of GEUTEBRÜCK NVR's with Axis cameras related to PTZ-controls and streaming performance. The streaming performance problems underlie the exchange of the camera-internal webserver. Appropriate adaption were included and the functionality was established again. Beyond that the error was evoked due to the change of the webserver. It can only be fixed by changing the 'Basic Setup'. In the field 'User' go to 'HTTP/RTSP Password Setting' and drop-down to 'Unencrypted only'.
